Team Number: 6   Date: Mar 4, 2021

Name #1	
Amr Almoallim	**Since last scrum:** ● Trying different stuff to get rfs working, different flashers, setups, firmwares
	Working on today: ● Ordered new ftdi cable and will look into how to convert map image into bitmap ● So that it is understood how to map in on the vga
	Roadblocks: ● Need discussion with Tawsif regarding map specifications: what parts to send, ● Where will it be sent from, resolution issues, color format, programming interface
Name #2	
Cody Li	**Since last scrum:** ● Finished layout and Login on android app
	Working on today: ● Adding a shopping cart interface
	Roadblocks: ● taking time cause still learning android practices
Name #3	
Jonathan Lew	**Since last scrum:** ● Planning stubs

	Working on today: ● Stub functions for bluetooth
	Roadblocks:
Name #4	
Jared Paul	Since last scrum: ● Tried compiling pathfinding on quartus and we ran out of space on the FPGA (out of LUTs)
	Working on today: ● Figuring out how we can use less logic blocks for pathfinding
	Roadblocks: ● FPGA space constraints
Name #5	
Tawsif Hasan	● Since last scrum: Used python OpenCV libraries to identify store sections from store map diagrams to generate test data.
	Working on today: ● Design the persistent layer/ postgres database to store the store, item and user information.
	Roadblocks: N/A
